MEMORANDUM FOR: Chief, General Scientific Division, OSI

ATTENTION :
FROM : Chief, CIA/PID (NPIC)
SUBJECT : Ch'eng-tu Radar Plant #784
REFERENCE : Requirement No. OSI/127/63
Project No. C 539/63

Declass Review by NGA.

1. This memorandum is in answer to referenced requirement concerning Ch'eng-tu Radar Plant #784.

2. The search for the aforementioned radar plant was initiated using the photographic references contained in the above referenced requirement . Additional coverage of the search area was obtained from photography dated . The search area included the Ch'eng-tu Complex, the suburbs and the outlying industrial areas. The Ch'eng-tu Radar Plant #784 could not be identified from the present photographic coverage of this area, however this search was not entirely negative. Two plants similar in plant layout to the Wan-king Radar Plant were located but a definite identification could not be made, since no radar equipment was observed. The activities of these two plants will be monitored on future photographic coverage over this area and the addressee of this memorandum will be notified of the results. This project is considered to be complete, but a new requirement should be submitted if an identification can be made from future photography.

3. The photo analyst on this project is who may be contacted on should you have further questions regarding this project.
